VIKAS PRADEEP

AI ROBOTICS

Salem, Tamil Nadu | +91 74187 30914 | vikaspradeep2006@gmail.com

PROFESSIONAL SUMMARY

B.Tech student in Artificial Intelligence & Data Science with a strong foundation in Python programming, SQL, data analysis, and AI concepts. Interested in building practical AI applications and data-driven solutions. Familiar with NLP, LLMs, Generative AI, Deep Learning, and Retrieval-Augmented Generation (RAG), with project experience in Python-based AI, IoT automation, and computer vision.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Data Analysis

AI & Machine Learning: NLP, LLMs, Generative AI, Deep Learning, RAG

Developer Tools: Git, GitHub

EXPERIENCE

AI Intern | GWC Data.AI, Hosur | 3 months

- Worked as an AI intern at GWC Data.AI, Hosur.

IT Support Intern | Kauvery Hospital – Central IT Support

- Provided technical support for hardware, software, and network-related issues.

PROJECTS

Smart Farming Automation | IoT, Machine Learning

- Developed an IoT- and AI-based smart farming system to automate irrigation, monitor soil and environmental conditions, and provide real-time crop health insights.
- **Tech:** Python, IoT Sensors, Arduino/ESP32, MQTT, Data Analytics

Autonomous Emergency Braking System | IoT, Computer Vision

- Built a prototype that detects obstacles, pedestrians, and vehicles using sensors and computer vision, and applies braking when a potential collision is detected.
- **Tech:** Python, OpenCV, Machine Learning, Ultrasonic Sensors/LiDAR

Jarvis AI Assistant | Python

- Developed a Python-based AI assistant to automate tasks and respond to user commands.
- Integrated voice recognition and speech output to support hands-free interaction.
- Automated tasks such as opening applications, searching the web, and retrieving information.
- Used Python libraries to process user inputs and execute commands.
- **Tech Stack:** Python, Speech Recognition, Text-to-Speech

SQL Analyst & Python Automation | SQL, Python

- Developed a Python-based automation workflow to process datasets and reduce repetitive manual tasks.
- Used SQL queries to retrieve, filter, sort, and analyze data from databases.
- Automated data cleaning and transformation using Python and Pandas.
- Generated summarized reports to identify trends and support data-driven decisions.
- **Tech Stack:** SQL, Python, Pandas, Data Analysis

EDUCATION

B.Tech, Artificial Intelligence & Data Science | Mahendra Engineering College, Namakkal | 2023 – 2027

- GPA: 8.1/10
- Relevant Coursework: Python Programming, Machine Learning, Artificial Intelligence, Operating Systems, Computer Networks, Cloud Computing
